INTERNATIONAL JOURNAL OF CHEMICAL KINETICS, VOL. VIII, 975–978 (1976)

Subject Index, Vol. VIII

ABSORPTION PHOTOMETRY, H-atoms (651)
ABSTRACTION, of Cl-atom from chloromethanes by trichlorosilyl radicals (673); of D-atom by CH_3 from acetaldehyde-d_1 (285) (295); of H-atoms by CH_3 from acetaldehyde and acetaldehyde-d_1 (285) (295); of H-atoms by Cl-atoms from asymmetrically halogenated ethanes (153); of H-atoms by isopropyl radicals from ethane and propylene (897)
ADDITION, of oxygen atoms to organosulfur compounds (451)
ALKANE ION charge transfer reaction (725)
ALKYL SUBSTITUTION, effect on rate of thermal isomerization of small ring compounds (563)
AMINO RADICAL, the isothermal flash photolysis of hydrazoic acid (139)
AMMONIA, reaction with ozone (357)
AMMONIUM NITRATE, formation in Ammonia-ozone reaction (357)
ANATION KINETICS, of aquopentaaminecobalt(III) (411)
AQUATION, of chlorobis(ethylenediamine)(amine) cobalt(III) complexes (573); of (dimethylformamide)pentaaminecobalt(III) ion (389)
AZOMETHANE, flash photolysis (883)
BEER'S LAW FAILURE, the isothermal flash photolysis of hydrazoic acid (139)
BIMOLECULAR ASSOCIATION, of amines with borontrifluoride (795)
BIMOLECULAR CHEMICAL REACTION, kinetics of, by a modified diffusion equation (481)
BIMOLECULAR INDUCED INTERSYSTEM CROSSING in sulfur dioxide (945)
BOND DISSOCIATION ENERGIES, of Me-SO_2, and c-C_6H_{11}-SO_2 (709)
BOND DISSOCIATION ENERGY, effect of OH substitution (173), of C-I bond in CH_3CF_2I (809)
BOND ENERGY, estimation by energy of activation of reaction RH + O_2 (123)
BROMINATION, of o-xylene catalyzed by HBr (277)
t-BUTYL RADICAL, kinetics of self-reactions in n-alkanes (341)
CARBON MONOXIDE reaction with OH (85)
CHARGE TRANSFER REACTIONS, in alkanes (725)
CHEMICALLY ACTIVATED FLUOROETHANES, unimolecular reactions of 1,1,2-trifluoroethane and 1,1,2,2-tetrafluoroethane (215)
CHLORINATION, and oxygen inhibited chlorination of 1,1,1,2-$C_2H_2Cl_4$ (11)
COBALT(III)-OXYGEN BOND RUPTURE in the (dimethylformamide) and (dimethyl sulfoxide) pentaaminecobalt(III) aquations (389)
COLLOIDS, ammonium nitrate formation (357)
COMBINATION, of t-butyl radicals (45); of Cl with NO (501); of ethyl radicals (381); of methyl radicals with molecular oxygen (777)
DECARBOXYLATION of malonic acid homologues (methylmalonic acid, n-dodecylmalonic acid and n-octadecylmalonic acid) in normal alkanols, kinetics of (609)
DECOMPOSITION, of isopropyl radical to ethylene and methyl radical (897); of alcohols (173)
DICHLOROETHYLENE, *cis* and *trans*, gas phase ozonolysis of (235)
DIELS-ADLER ADDITION, of Acrolein to cyclohexa-1,3-diene and its reverse reaction (641)
DIFFUSION EQUATION WITH SINK TERM, kinetics of bimolecular chemical reaction by (481)

DISSOCIATION, of nitrous oxide in shock waves, and the effect of H_2 upon N_2O (459)
ELECTRON TRANSFER, from triplet pyrene in micelles to Br_2^- in aqueous solution (817)
ELECTRONICALLY EXCITED OXYGEN ATOMS ($O(^1D)$), formation in the reaction of $O(^1D)$ with CH_4 (107)
ELIMINATION, of hydrogen fluoride in the photolysis of hexafluoroacetylacetone (859) (877); of H_2O from alcohols (173)
ENERGY DISPOSAL, in unimolecular reaction, three-centered DF elimination (215)
ENERGY OF ACTIVATION of reaction RH + O_2, using for estimation of RH the bond energy (123)
ENTROPY, of *t*-butyl radicals (45)
FLASH PHOTOLYSIS, in the study of the rate of the reaction between hydroxyl radicals and methane (397); isothermal, of hydrazoic acid (139); of azomethane (883); recombination of chlorine atoms (501)
FLUORINATED SURFACES, for reactions vessels (23)
GAS-SOLID REACTIONS, nonlinear, analyzed by modulated molecular beam methods (625)
HALOCARBON WAXES, fluorinated, for non-reactive surfaces (23)
HALOGENS, reactions of O ^3P_J atoms with (425)
HEATS OF FORMATION, of hydroxy-alkyl radicals (173)
HYDROXYL RADICAL, the reaction of OH with CO (85); the reaction of OH with NO (99)
HYDRAZOIC ACID, the isothermal flash photolysis of (139)
HYDROLYSIS of coordinated dimethylformamide (389)
IMINO RADICAL, the isothermal flash photolysis of hydrazoic acid (139)
INERT SURFACES, for reaction vessels, by fluorination (23)
INTERNALLY HYDROGEN BONDED ACID, mechanism of reaction with hydroxyl ions (741)
INTERSYSTEM CROSSING RATION, in sulfur dioxide (585)
ION-MOLECULE REACTIONS in alkanes (725)
IONIZATION POTENTIALS of alkanes (725)
IR STUDY of the reaction of ozone with methyl and ethyl nitrites (307)
ISOMERIZATION, of *cis*- and *trans*-1,2-difluoroethylene (511) (519) (585); of cycloheptatriene (695); of the two-pentenes (935) (945); thermal, of small ring compounds (563)
ISOTOPE EFFECTS, non-equilibrium in vinyl (825)
ISOTOPE EXCHANGE, in methane-deuterium mixtures (111)
KINETICS, of colloid formation (357); gas-phase ozonolysis of *cis*- and *trans*-dichloroethylene (235)
LASER ABSORPTION and study of methane isotope exchange (111)
LASER FLUORESCENCE MEASUREMENTS, for hydroxyl radicals, smog reactor (765)
LASER, TANDEM, use of to study photoelimination of hydrogen fluoride from hexafluoroacetylacetone (877)
LIQUID-PHASE REACTIONS of trichloromethyl radicals (131)
LIQUID-BASE REACTIONS of trichloromethyl radical in *n*-hexane solution (599)
MECHANISM, modeling of, for the reaction of nitric oxide with hydrogen (259); modeling of, methane isotope exchange (111); of alcohol decomposition (173)
METASTABLE, Nitrogen ($A\,^3\Sigma_u^+$), quenching by O_2, O, N, and H (161)
METHANE, H_2 formation in the reaction of $O(^1D)$ with (107)
MOLECULAR BEAM KINETICS, reaction of I_2 and F_2 (605)
MOLECULAR BEAM SURFACE KINETICS EXPERIMENTS, analysis of nonlinear reactions (625)
NANOSECOND FLASH PHOTOLYSIS, of 1,4-dinitronaphthalene (541); of β-nitronaphthalene (529)

NITRIC OXIDE, the reaction of OH with NO (99)
NON-EQUILIBRIUM EFFECTS, in the isomerization of cycloheptatriene (695)
NUCI EATRON KINETICS, ammonium nitrate formation (357)
OXIDATION, gas-phase ozonolysis of *cis*- and *trans*-dichloroethylene (235); of ammonia by nitric oxide and oxygen (315); of $1,1,1,2\text{-}C_2H_2Cl_4$ (11); of iodide by hydrogen peroxide catalyzed by molybdate (1)
OXIDATION KINETICS, of α-hydroxy acids and α-hydroxy ketones by potassium bromate mechanism (205)
OXYGEN ATOMS, reactions with halogens (425)
OZONE, gas-phase ozonolysis of *cis*- and *trans*-dichloroethylene (235); reaction with ammonia (357)
OZONOLYSIS, gas phase, of *cis*- and *trans*-dichloroethylene (235); of alkenes (25); of formaldehyde (801); of methyl and ethyl nitrites (307)
PERCHLORATE ION, dependence of aquation rate of (dimethylformamide)pentaaminecobalt(III) ion (389)
PHOTOCHEMISTRY, of hexafluoroacetylacetone (859), (877)
PHOTOIONIZATION quantum yields (725)
PHOTOIONIZATION MASS SPECTROMETER, used to detect methyl radicals (777)
PHOTOLYSIS, flash, isothermal, of hydrazoic acid (139); of azoethane and hexafluoroazomethane (959); of sulfur dioxide (511) (519) (585); of sulfur dioxide in the presence of olefins (687); of sulfur dioxide at 3130Å (945); of sulfur dioxide at 3660Å (935)
PRESSURE BROADENING, atomic absorption photometry (651)
PROTON TRANSFER, between internally hydrogen-bonded acids and hydroxyl ions (741)
PYROLYSIS, of alcohols, alkenes (173); of alkyl nitrites (911); of dimethyl peroxide (491); of *s*-butyl nitrite (911); of *t*-butyl nitrite (59)
QUENCHING, of $SO_2(^3B_1)$ (687); of metastable $N_2(A\,^3\Sigma_u^+)$ by O_2, O, N, and H, rate constants for (161)
RRKM THEORY, application to vibrationally excited vinyl and deuterium substituted analogs (825); calculations on alcohols, alkanes (193)
RACEMISATION, of aqua and hydroxobis(ethylenediamine)(amine)cobalt(III) complexes (573)
RADIOLYSIS of fluorinated ethanes and ethenes (753)
RATE CONSTANTS, for reaction of $O(^3P)$ atoms to vinyl halides (475)
REACTION, gas-phase ozonolysis of *cis*- and *trans*-dichlcroethylene (235); of oxygen with hydrocarbons, estimation of R-H bond energy by the energy of activation (123)
REACTION MECHANISM, H_2 formation in the reaction of $O(^1D)$ with CH_4 (107); the reaction of OH with CO (85)
REACTION RATE COEFFICIENT, the reaction of OH with CO (85); the reaction of OH with NO (99)
REACTIVE ROUTES, in reactions of oxygen atoms with organosulfur compounds (451)
RECOMBINATION, inhibition of, at fluorinated surfaces (23); of chlorine atoms (501)
RECOMBINATION RATES, for H-atoms (651)
REDUCTION of nitric oxide by ammonia in the presence of oxygen (315)
SHOCK TUBE, decomposition of alcohols (173); pyrolysis, of cycloheptatriene (695); reaction of hydroxyl radicals with hydrogen, carbon monoxide, methane, trifluoromethane, ethylene, and ethane (549)
SHOCK WAVES, methane-deuterium exchange in (111)
TANDEM LASER, use of to study photoelimination of hydrogen fluoride from hexafluoroacetylacetone (877)
TEMPERATURE DEPENDENCE, of aquation of (dimethylformamide)pentaaminecobalt(III) ion (389); of H-atom abstraction calculated by the BEBO theory (295)

THERMAL ACTIVATION, effect of on the reaction of toluene with H-atoms (321)
THERMAL REACTION of *cis*- or *trans*-2-butene (37)
TIME RESOLVED SPECTROSCOPY, the isothermal flash photolysis of hydrazoic acid (139)
UNIMOLECULAR REACTIONS, fall-off curve for combination of Cl with NO (501)
VERY LOW-PRESSURE PYROLYSIS, of cycloheptatriene (695)

INTERNATIONAL JOURNAL OF CHEMICAL KINETICS, VOL. VIII, 979–981 (1976)

Index of Compounds, Vol. VIII

ACETYLENE, reaction of H-atoms with (825)
ALCOHOLS, pyrolysis in shock waves (173); RRKM calculations on rates of decomposition (193)
ALKANES, RRKM calculations on rates of decomposition (193)
ALKYL NITRITES, gas phase pyrolysis of (911)
AMINES, bimolecular association with borontrifluoride (795)
AMMONIA, reaction with nitric oxide and oxygen (315)
AZOETHANE, photolysis of (959)
AZOMETHANE, flash photolysis (883)
Br_2^- RADICAL, reaction with the triplet state of pyrene (817)
Br(V), kinetics of oxidation of α-hydroxy acids and α-hydroxy ketones by (205)
BICYCLO[2,2,0]HEXANES, thermal isomerization of (563)
BORONTRIFLUORIDE, bimolecular association with amines (795)
BUTENE-2, isomerization and hydrogen elimination (37)
s-BUTYL NITRITE, gas phase pyrolysis of (911)
t-BUTYL NITRITE, pyrolysis of (59)
t-BUTYL RADICALS, combination, thermochemistry, heat of formation, internal rotation (45)
1,1,1,2-$C_2H_2Cl_4$, chlorination, oxygen inhibited chlorination and chlorine photosensitized oxidation (11)
CARBON MONOXIDE, shock tube study of reaction with hydroxyl radical (549)
CARBON TETRACHLORIDE reaction with hexyl radicals (599)
CHLORINE ATOMS, reaction with asymmetrically halogenated ethanes (153); recombination of (501); recombination with NO (501)
1-CHLORO-4-ETHYLBICYCLO[2,2,0]HEXANE, Arrhenius parameters for the thermal isomerization of (563)
1,1-CHLOROFLUOROETHANE, H-atoms abstraction by Cl-atoms (153)
CHLOROMETHANE, metathetical reactions with trichlorosilyl radicals (673)
1-CHLORO-4-METHYLBICYCLO[2,2,0]HEXANE, Arrhenius parameters for the thermal isomerization of (563)
COBALT(III) COMPLEXES, aquation and racemisation of chloro-, aqua, and hydroxobis-(ethylenediamine)cobalt(III) (573)
COBALTPENTAAMINEAQUO or aquopentaaminecobalt(III), anation by Malonate (411)
CUMENE, reaction with oxygen (123)
CYCLOHEPTATRIENE, isomerization at high temperatures (695)
CYCLOHEXANE, ionization potential (725)
CYCLOHEXA-1,3-DIENE, Diels-Alder reaction with Acrolein (641)
DECANOL-1, decarboxylation of malonic acid homologues in (609)
DEUTERIUM, isotope exchange of (111)
Cis- and *trans*-1,2-DICHLOROETHYLENE, sulfur dioxide photosensitized isomerization of (519)
1,1-DIFLUOROETHANE, H-atoms abstraction by Cl-atoms (153)
cis-DIFLUOROETHYLENE, quenching of $SO_2(^3B_1)$ (687)
cis- and *trans*-1,2-DIFLUOROETHYLENE, sulfur dioxide photosensitized isomerization of (511) (585)

2,2-DIFLUORO-2,3-DIHYDRO-5-TRIFLUOROMETHYLFURAN-3-ONE, formation of, in photolysis of hexafluoroacetylacetone (859)
1,1-DIFLUOROETHYLENE, quenching of $SO_2(^3B_1)$ (687)
DIFLUOROMETHYLENE, formation in the pyrolysis of hexafluoroacetylacetone (859)
1,1-DIFLUOROIODOETHANE, C-I bond dissociation energy in, kinetics of reaction with HI (809)
2,2-DIMETHYLBUTANE, ionization potential (725)
2,3-DIMETHYLBUTANE, ionization potential (725)
(DIMETHYLFORMAMIDE)pentaaminecobalt(III)perchlorate (389)
DIMETHYL PEROXIDE, pyrolysis of (491)
(DIMETHYL SULFOXIDE)pentaaminecobalt(III) perchlorate (389)
1,4-DINITRONAPHTHALENE, triplet and excited state, spectroscopy and reactivity (541)
n-DODECYLMALONIC ACID, decarboxylation of in heptanol-1 (609)
ENDO-5-FORMYLBICYCLO[2,2,2]OCT-2-ENE, retro Diels-Alder pyrolysis (641)
ETHANE, abstraction of hydrogen by isopropyl radical from (1); shock tube study of reaction with hydroxyl radicals (549)
ETHANETHIOL, reaction with oxygen atoms (451)
ETHENOXY RADICAL, role in the pyrolysis of acetaldehyde (285)
ETHYL FLUORIDE, H-atoms abstraction by Cl-atoms (153)
ETHYL NITRITE, kinetics of reaction with ozone (307)
ETHYL RADICALS, combination, thermochemistry, internal rotation (381)
ETHYLENE, quenching of $SO_2(^3B_1)$ (687); reaction with ozone (25); shock tube study of reaction with hydroxyl radicals (549)
FLUORINE, reaction with iodine (605)
FLUOROETHYLENE, quenching of $SO_2(^3B_1)$ (687)
FORMALDEHYDE, ozonolysis of (801)
n-HEPTANE, ionization potential (725); reaction with oxygen (123)
HEPTANOL-1, decarboxylation of *n*-dodecylmalonic acid in (609)
HEXAFLUOROACETYLACETONE, photochemistry of (859), (877)
HEXAFLUOROAZOMETHANE, photolysis of (959)
HEXANOL-1, decarboxylation of malonic acid homologues in (609)
HYDROGEN, effect upon nitrous oxide dissociation (459); reaction with nitric oxide in shock waves (259); shock tube study of reaction with hydroxyl radicals (549)
HYDROGEN ATOMS, absorption photometry and recombination rates for (651); abstraction from asymmetrically halogenated ethanes by Cl-atoms (153); the reaction of toluene with (321)
HYDROGEN FLUORIDE, formation from irradiated fluorinated ethanes and ethenes (753); photo-elimination of, from hexafluoroacetylacetone (859), (877)
HYDROGEN IODIDE, kinetics of reaction with 1,1-difluoroiodoethane (809)
HYDROGEN PEROXIDE, reaction with iodide catalyzed by molybdate (1)
α-HYDROXY ACIDS, kinetics of oxidation by potassium bromate mechanism (205)
α-HYDROXY KETONES, kinetics of oxidation by potassium bromate mechanism (205)
HYDROXYL RADICAL, gas phase (765); rate of the reaction with methane (397); reaction with hydrogen, carbon monoxide, methane, trifluoromethane, ethylene, and ethane (549)
IODIDE, oxidation by hydrogen peroxide catalyzed by molybdate (1)
IODINE, reaction with fluorine (605)
ISOPROPYL RADICAL, reaction with ethane and propylene, decomposition to methyl radical and ethylene (897)
METHANE, isotope exchange of (111); rate of the reaction with hydroxyl radicals (397); shock tube study of reaction with hydroxyl radicals (549)
METHANESULFONYL CHLORIDE, radiolysis in liquid cyclohexane (709)

METHANETHIOL, reaction with oxygen atoms (451)
METHYL NITRITE, kinetics of reaction with ozone (307)
METHYL RADICAL, reaction with acetaldehyde and acetaldehyde-d_1 (285) (295); reaction with atomic and molecular oxygen (777); reaction with nitric oxide (883)
METHYLCYCLOPENTANE, ionization potential (725)
METHYLMALONIC ACID, decarboxylation of in normal alkanols (609)
3-METHYLPENTANE, ionization potential (725)
METHYLSULFIDE, reaction with oxygen atoms (451)
MOLYBDATE, catalyzed oxidation of iodide by hydrogen peroxide (1)
NITRIC OXIDE, combination with chlorine atoms (501); reaction with ammonia and oxygen (315); reaction with hydrogen in shock waves (259); reaction with methyl radical (883)
β-NITRONAPHTHALENE, triplet excited state, spectroscopy and reactivity (529)
4-(NITROPHENYLAZO) RESORCINOLS, reaction with hydroxyl ions (741)
NITROSYLCHLORIDE, formation from Cl + NO (501)
NITROUS OXIDE, dissociation of, reactions with oxygen atoms, effect of hydrogen upon dissociation of (459)
n-OCTADECYLMALONIC ACID, decarboxylation of in normal alkanols (609)
n-OCTANE, ionization potential (725)
OCTANOL-1, decarboxylation of malonic acid homologues in (609)
OXYGEN, reaction with ammonia and nitric oxide (315); reaction with C-H bond hydrocarbons (123)
OXYGEN ATOMS, reaction with ethanethio, methanethio, and methylsulfide (451); reaction with nitrous oxide (459); reaction with vinyl fluoride, vinyl chloride, and vinyl bromate (475)
OZONE, gas reaction of H_2CO with (801); kinetics of reaction with methyl and ethyl nitrites (307); reaction with alkenes (25)
cis- and *trans*-2-PENTENE, isomerization of (935) (945)
PERFLUOROETHYLENE, quenching of $SO_2(^3B_1)$ (687)
PERFLUOROPROPYLENE, quenching of $SO_2(^3B_1)$ (687)
PHENYLAZORESORCINOL, reaction with hydroxyl ions (741)
PROPYLENE, abstraction of hydrogen by isopropyl radical from (897)
PYRENE, reaction of the triplet state with Br_2^- (817)
SULFUR DIOXIDE, photolysis of (935) (945); quenching of $SO_2(^3B_1)$ state by olefins (687); reaction with *cis*- and *trans*-1,2-dichloroethylene (501) (519) (585)
TETRACHLOROMETHANE reaction with cyclohexyl radicals (131)
TOLUENE, reaction with H-atoms (321); reaction with oxygen (123)
1,1,2-TRIFLUOROETHANE-1-d_1, unimolecular reactions and energy disposal (215)
TRIFLUOROMETHANE, shock tube study of reaction with hydroxyl radicals (549)
VINYL BROMIDE, reaction with oxygen atoms (475)
VINYL CHLORIDE, reaction with oxygen atoms (475)
VINYL FLUORIDE, reaction with oxygen atoms (475)
VINYL RADICALS, vibrationally excited (825)
o-XYLENE, HBr catalyzed bromination of (277)
